Dear Hiring Manager,

I am writing to express my interest in a data-focused opportunity within your organization. As a recent Master's graduate in Data Science from Rowan University with a strong foundation in data engineering, analytics, and cloud technologies, I bring both academic excellence and practical experience that make me a strong fit for data-driven roles.

During my internship with the Rowan ACM Club, I implemented Infrastructure as Code solutions using Terraform and CloudFormation, and built scalable data pipelines using Azure Data Factory, Databricks, and Kubernetes. These experiences allowed me to automate deployments, optimize data integration, and create Power BI dashboards that directly informed decision-making. Previously, at Roothoot Pvt Ltd, I worked on large-scale restaurant analytics, built real-time Tableau dashboards, and optimized SQL queries on AWS Redshift for improved performance.

My technical proficiency spans Python, SQL, Power BI, AWS, Snowflake, Azure, and a variety of modern tools including Docker, Apache Kafka, and Kubernetes. I've also completed certifications such as the AWS Associate Data Engineer and Microsoft Power BI Analyst credentials, which underscore my commitment to continuous learning and professional growth.

I am confident that my skills, adaptability, and enthusiasm for working with data will enable me to contribute meaningfully to your team. I have attached my resume for your consideration and would welcome the opportunity to further discuss how I can support your goals.

Thank you for your time and consideration.

Sincerely,

Lohith Kovuri
